

**TECHNICAL DETAILS**

seat integral polyurethane, with rounded edge (to assist blood circulation) and non-slip finish. Available with seat tilt adjustment from 2° to 15°. Available in a low version or high version with footrest.

footrest painted die-cast aluminium, non-slip, height-adjustable.

device seat inclination adjustment, which makes it ideal for work tasks that require operators to alternate between a seating and standing position.

height adjustment by gas lift. Allows a 13 cm excursion for the seat with a 5-star base on castors, 26 cm for the stool with feet.

base 5-star base in black nylon or polished aluminium. Available with:

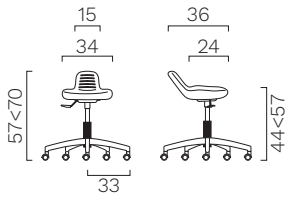

- soft dual-tread, rubber-coated, self-braking swivel castors Ø 50 mm for hard floors.
- locked castors Ø 50 mm with operator sitting (Type Chairstop).
- fixed glides.
