CLASSE 2

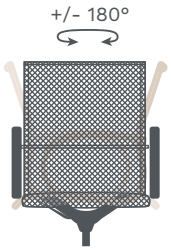

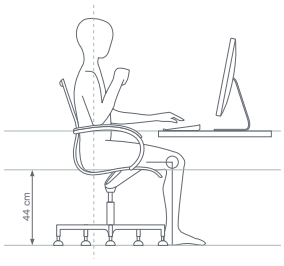

EM 202 Mesh - Meeting chair

TECHNICAL DETAILS

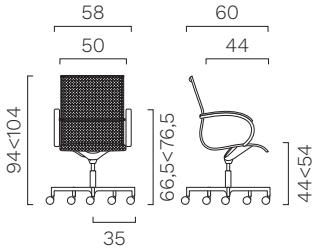

unibody	with stretch mesh attached to an aluminium frame, consisting of side and cross elements joined together to support and tighten the mesh. The mesh backrest is breathable and adapts to the user's body shape while properly supporting the spine. White or black painted or polished aluminium structure's finish. Available with medium and low backrest.
armrests	in die-cast aluminium with black or white polyurethane elbow-rests.
device	automatic return device. The mechanism allows the seat to automatically return to its initial position. It allows a rotation of 180° to the right and 180° to the left. Only available for the meeting chair version with medium backrest and base with glides. 
fork support	in a polished finish or painted in white or black.
height adjustment	with gas lift system, which allows a 10 cm excursion.
base	- 5-star base in polished aluminium or with black or white epoxy powder coating. Self-locking, dual-tread, rubbered, swivel castors for hard floors (Ø 60 mm for polished base, Ø 65 mm for white or black painted base) or glides.
ergonomics	Classe 2 is equipped with the necessary mechanisms for proper and comfortable use, even for prolonged periods, as long as the following conditions are met: the standard sitting position requires maintaining angles of 90° between torso and thigh, between thigh and leg, and between leg and foot. These last two angles are essential so that the foot, resting completely on the surface below, discharges part of the weight of the lower limb onto it, preventing excessive compression on the back thigh surface and promoting blood circulation to the heart.
