JODIE

Jodie Black - Executive chair

TECHNICAL DETAILS

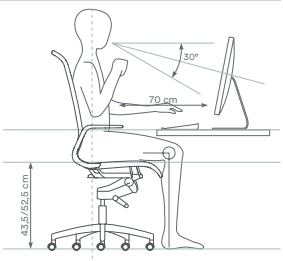

unibody	in supporting elastic mesh fixed to a black nylon frame that supports and keeps the mesh tensioned. The mesh backrest is breathable and adapts to the user's body shape while properly supporting the spine.
armrests	fixed in black nylon.
device	tilting device lockable in 4 positions (with polished finish cover), lateral adjustment of the backrest's resistance in relation to the user's weight and anti-shock release system. This mechanism allows to change the user's position while maintaining the proper trunk/thigh angle. A soft release system allows the user to control the movement of the backrest when released.
height adjustment	with gas lift system, which allows a 9 cm excursion.
base	5-star base in black nylon or polished die-cast aluminium. Self-locking, dual-tread, rubbered, swivel castors, for hard floors Ø 65 mm as standard.
ergonomics	Jodie is equipped with the necessary mechanisms for proper and comfortable use, even for prolonged periods, as long as the following conditions are met: the standard sitting position requires maintaining angles of 90° between torso and thigh, between thigh and leg, and between leg and foot. These last two angles are essential so that the foot, resting completely on the surface below, discharges part of the weight of the lower limb onto it, preventing excessive compression on the back thigh surface and promoting blood circulation to the heart.

Left-hand lever locks the seat in 4 positions

Right lever adjusts the height of the seat

Right-hand outer handle adjusts the backrest's spring tension

base finishes	Polished aluminium	Black nylon
mesh	**Cat. N** Target TABI	TANE
	Cat. K Max S9M0	S9G0 S9G1 S9NE
