TECHNICAL DATA

design G. Perin & G. Topan

structure

leg: made of an extruded aluminium profile with a trapezoidal section (W. 165 mm × D. 55 mm). The upper part of the leg is milled to accommodate a 5 mm thick steel sheet bracket, to which a reinforcing tube (W. 50 mm × D. 30 mm) made from 2 mm thick steel sheet is welded. At the lower end, the leg is fitted with a 5 mm thick steel sheet bracket which also houses an adjustable foot (Ø 30 mm) made of steel with a polyethylene coating, allowing +10 mm height adjustment for levelling. Available with an oxidised and brushed finish (for the bronze and aluminium versions) or a textured epoxy powder-coated finish (for the black version). The leg is equipped with an adjustable foot providing +10 mm height adjustment for floor levelling.

top

melamine: made of 18 mm thick chipboard (density 720 kg/m³, formaldehyde emissions compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), finished with anti-reflex melamine resins and edged with 2 mm ABS edging with rounded edges.
veneered: made of 20 mm thick chipboard (density 720 kg/m³, formaldehyde emissions compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced on both sides with natural wood veneer, lacquered on the visible side and left unfinished on the underside. The perimeter edge is finished with 2 mm thick natural wood veneer edging.
Hpl: made of 19 mm thick chipboard (density 720 kg/m³, formaldehyde emissions compliant with EU Regulation 2023/1464 and EPA TSCA Title VI), faced on the top side with 0.8 mm thick High Pressure Laminate (HPL). The panel is edged with 1 mm thick colour-matched ABS edging with rounded edges. Total thickness: 20 mm.

The top is fitted with threaded inserts for leg attachment. Overall table height: 39.5 cm.
