## TECHNICAL DATA

structure (sides, lid, bottom and back)	<u>melamine</u> : 18 mm thick chipboard (density 720 kg/m <sup>3</sup> , formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title V) for sides, top and bottom (edged with 0.45 mm thick ABS) and 12 mm thick for back, finished with anti-reflex melamine resins. The sides, top and bottom feature milled slots for inserting the back. Each side has double 1"1/4 holes for fixing the shelves.																																
frame	The structure rests on a frame made of 25x25 mm square section steel tubing, 1.5 mm thick, powder coated with an embossed finish.																																
shelves	<u>melamine</u> : made of 25 mm thick chipboard (density 720 kg/m <sup>3</sup> , formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title V) finished with anti-reflex melamine resins and edged with 2 mm thick ABS on the side facing the front. The shelf is supported by brackets fitted into the side holes.  <u>metal</u> : made of 0.8 mm thick steel sheet painted with epoxy powders and supported by brackets fitted into the side holes. The shelves, on the lower side, are designed for hanging A4 format folders (only for cabinets with a depth of 18"1/8). The total thickness of the shelf is 25 mm.																																
	<b>Maximum number of hanging files per shelf:</b> (considering an average thickness of 2 cm per file)

doors	<u>melamine</u> : 18 mm thick chipboard (density 720 kg/m <sup>3</sup> , formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title V), finished with anti-reflex melamine resins and ABS edging (2 mm thick with rounded edges). The doors are equipped with a lock with removable cylinder (to allow the code to be changed) and are supplied with 2 folding keys. The closing mechanism features a rotating blade. The doors are secured by brackets fixed with wood screws to the bottom, lid or structural shelf. The hinges are made of steel with a 110° opening and an integrated soft-closing mechanism to dampen the closing of the door. The left door is equipped with a PVC profile that also acts as a dust barrier. The doors are designed for the attachment of handles with a 5" pitch.																																

wood: 19 mm thick chipboard (density 720 kg/m<sup>3</sup>, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title V), veneered on both sides with natural wood veneer thickness approx. 0.6 cm and edged in wood or ABS (thickness 2 mm with rounded edges). The surfaces are painted with acrylic-based paints. The doors are equipped with a lock with removable cylinder (to allow the code to be changed) and are supplied with 2 executive keys, one of which is folding. The closing mechanism features a rotating blade. The doors are secured by brackets fixed with wood screws to the bottom, lid or structural shelf. The hinges are made of steel with a 110° opening and an integrated soft-closing mechanism to dampen the closing of the door. The left door is equipped with a PVC profile that also acts as a dust barrier. The doors are designed for the attachment of handles with a 5" pitch.

top, sides and finishing back

melamine: 18 mm thick chipboard (density 720 kg/m<sup>3</sup>, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title V) finished with anti-reflex melamine resins and ABS edging (2 mm thick with rounded edges). Fixed to the structure with wood screws.

wood: 19 mm thick chipboard (density 720 kg/m<sup>3</sup>, formaldehyde emission compliant with EU Regulation 2023/1464 and EPA TSCA Title V), veneered on both sides with natural wood veneer thickness approx. 0.6 cm and edged in wood or ABS (thickness 2 mm with rounded edges). The visible surfaces are painted with acrylic-based paints. They are fixed to the structure with wood screws.
